INTRODUCTION TO CARSPLIT

Greetings, luxury car enthusiasts ! Welcome to **Carsplit**, a revolutionary new project that aims to make **supercar** ownership accessible to everyone.

Our innovative platform will enable individuals to own a supercar or a fraction of a **supercar**, which will be available for rental through our company. With **Carsplit**, you can now experience the thrill of owning a **supercar** without the financial burden of purchasing one outright.

But that's not all – our platform also allows you to **earn a percentage** of the rental income generated by your vehicle. You can now turn your **supercar** into a passive income stream, while also sharing the experience with others.

Additionally, all owners will be able to trade their share on our marketplace, providing **flexibility** and **liquidity** for their **investment**.

Join us on this exciting journey as we disrupt the traditional supercar ownership model and make it accessible to all. Explore our platform, discover our collection of luxury vehicles, and start experiencing the thrill of **supercar** ownership today with **Carsplit**.

HOW DOES CARSPLIT WORK

MARKET ANALYSES

THE RISE OF THE MARKET IN RECENT YEARS

The rise of vehicle rental can be traced back to the early 20th century when rental companies began to offer short-term car rentals to individuals. Over time, the industry grew as more people began to travel for leisure and business, creating a demand for rental cars.

In the 1960s and 1970s, the industry saw a significant expansion as larger companies such as **Hertz** and **Avis** entered the market, offering a wider range of vehicles and services. The introduction of computer reservation systems in the 1980s streamlined the rental process, making it more accessible to customers.

The 21st century has brought about significant changes in the industry, with the emergence of new players such as **Zipcar** and **Car2Go**, offering car-sharing services that allow customers to rent cars for short periods, often by the hour. The rise of ride-hailing services such as **Uber** and **Lyft** has also impacted the rental industry, with some companies adapting to offer similar services.

Today, the vehicle rental industry is a major player in the transportation sector, with **rental cars** available in most parts of the world, catering to a wide range of customers from **tourists** and **business travelers** to **local residents** in need of temporary transportation. The industry continues to evolve, with new technologies such as **blockchain** and **electric** vehicles creating new opportunities and challenges for rental companies.

As the rent market continues to evolve, **Carsplit** is poised to be a leader in the next frontier of supercar ownership.

LIMITATION OF RENTAL

While the vehicle rental industry is a major player in the transportation sector, there are several limitations and challenges that rental car businesses face:

- **High costs:** Rental car businesses require a significant investment in vehicles, maintenance, and infrastructure. This can be a barrier to entry for new companies and can limit the growth of existing businesses.
- **Intense competition:** The vehicle rental industry is highly competitive, with many companies vying for market share. This can result in pricing pressure and reduced profit margins.
- **Seasonal fluctuations:** The demand for rental cars is often seasonal, with peak demand during the summer and holiday seasons. This can result in reduced revenue and increased competition during the off-season.

- **Insurance and liability:** Rental car businesses face significant risks related to vehicle damage, theft, and liability. This requires careful management and insurance coverage, which can be costly.
- **Dependence on travel industry:** The vehicle rental industry is heavily dependent on the travel industry, including airlines, hotels, and tourism. Economic downturns or other disruptions to travel can have a significant impact on rental car businesses.

Carsplit offers a solution to the problems by **leveraging** the sharing economy model, we can reduce the high costs associated with vehicle rental businesses. Owners will share the maintenance and infrastructure costs, making it easier for new companies to enter the market and for existing businesses to scale. Also, Dubai's status as one of the **most popular tourist destinations** and **high-income** earners make it a prime market for **Carsplit**.

ADVANTAGES OF SUPERCAR

Renting a **supercar** as a business can have several advantages over renting a regular car, including:

- **Higher Rental Fees:** Super cars typically command much higher rental fees than regular cars, allowing our business to earn a higher revenue per rental.
- **Attracting High-End Clients:** Renting a supercar will attract high-end clients who are looking for an exceptional and unique driving experience. These clients will be willing to pay a premium for the experience, which will increase our profits.

- **Competitive Edge:** Renting supercars give our business a competitive edge over other rental companies that only offer regular cars. This will help us to stand out in a crowded market and attract more customers.
- **Marketing Opportunities:** Super cars are often associated with luxury and exclusivity, which will provide our business with marketing opportunities. We will use the vehicles in marketing campaigns and social media posts to promote our business and increase brand awareness.
- **Improved Reputation:** Renting out supercars will improve our business's reputation as a provider of high-quality and exclusive services. This will lead to more referrals and repeat business.
- **Flexibility:** Depending on the specific cars in our rental fleet, our supercars can be rented out for a variety of purposes, including special events, photo shoots, and corporate functions. This can increase the flexibility and versatility of our business, allowing us to offer a range of services to different types of customers.
- **Damages:** Our revenue by renting supercars will increase due to the potential for additional revenue from customer deposits in case of damages.

The introduction of **Carsplit** with **WEB3 technology** is revolutionary and offers numerous possibilities for **supercar** owners and the marketplace. This innovative model allows owners to rent out their vehicles with the assurance that any damages caused by renters will result in **additional revenue** from the deposit. The integration of **WEB3 technology** also brings a new level of **transparency** and **security** to the marketplace, creating a trustworthy and efficient platform for both owners and renters. With **Carsplit**, the possibilities for revenue generation and market disruption are **limitless**.

MARKETING STRATEGY

- Names of buyer for 72 hours (shooting photo and video to remember)
- The best investor will be invite in Dubai and will ...
- Private group
- Karting competition for investor
- TOP 5 investor will have 3 days free access to the car (15 days)
- Top tiers 25% will have 30% discount to rent the car
- 500+ dollars investor will all have a gift

To support the development of a **strong community**, we will provide the necessary **tools** and **resources** to make it easy for users to participate in the platform. We will also provide incentives for users to engage with the platform and participate in the community, such as special **promotions**, **rewards**, and **recognition**.

To further engage our users, we plan to actively engage with them on social media, forums, and other channels. We will provide regular updates on the platform's development, respond to user feedback, and create opportunities for users to engage with each other and with our team. By fostering a strong and engaged community, we believe that **CARSPLIT** can become a leading platform in the blockchain-based car trading industry.

TECHNOLOGY BEHIND CARSPLIT

At **Carsplit**, we believe that **everyone** should have **access** to **luxury vehicles**, and our platform is designed with accessibility and user-friendliness in mind. As a web3 marketplace, our platform utilizes **blockchain technology** to ensure the safety and security of transactions for both car owners and renters.

With our easy payment system, renters can quickly and securely pay for their rental, without the need for complicated payment processes. This creates a hassle-free experience for both car owners and renters alike.

Furthermore, our use of **blockchain technology** ensures that all transactions are secure and tamper-proof, providing car owners with the peace of mind that their investment is protected. This level of security is not possible with traditional rental car companies, making **Carsplit** a **revolutionary** player in the car rental industry.

Overall, the combination of **accessibility**, **security**, and **ease-of-use** make **Carsplit** an attractive choice for both car owners and renters, and a **game-changer** for the future of the car rental industry.

SECURITY AND TRANSPARENCY

At **Carsplit**, we prioritize the **security** and **privacy** of our investors. That's why we have implemented cutting-edge **blockchain technology** to provide a secure and transparent platform for all transactions and data. By **leveraging** the immutable ledger of the **blockchain**, we ensure that all information and transactions are recorded and verified with the **highest level of security**.

Moreover, we have taken extra measures to **protect** our **investors data and assets** from potential threats. Our platform undergoes regular audits and testing to maintain the **highest level of security**, and we are committed to staying ahead of any potential risks.

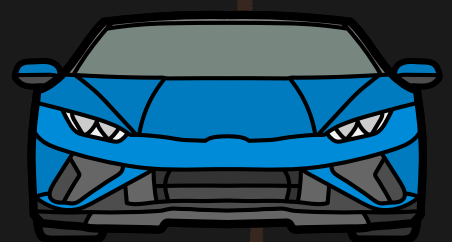

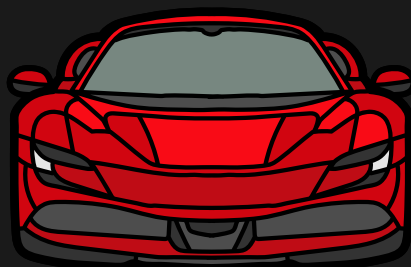

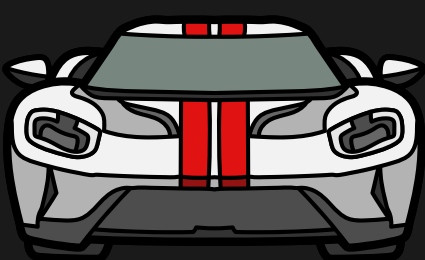

We also believe in the **power of transparency** to build trust with our investors. All our operations and processes are **open and transparent**, allowing our investors to easily track and verify the progress of their **investments**. With **Carsplit**, our **investors** can rest assured that their data and assets are **safe and secure**.

THE MARKETPLACE

Carsplit's marketplace provides a **seamless** and **secure** platform for **investors** to buy and sell their shares in Supercars. With our user-friendly interface and **advanced technology**, investors can easily track the performance of their investments and make informed decisions. Our marketplace also allows investors to **connect** with potential buyers or sellers, providing a **transparent** and **efficient** process for trading shares. At **Carsplit**, we are dedicated to providing a **robust** and **reliable** marketplace for our investors to **maximize** their returns.

As a top investor on the **Carsplit** marketplace, you'll enjoy exclusive **perks** and **benefits**, such as early access to new investment **opportunities**, priority customer support. Plus, as your investment portfolio grows, you'll have the potential to earn **higher returns** and **increase** your stake in the world of luxury car rentals.

Don't miss out on the opportunity to become a **Carsplit VIP** investor today !

THE FUTURE OF CARSPLIT

For **Carsplit**, we are committed to **revolutionizing** the car rental industry by providing a **unique** and hassle-free **experience** for both car **owners** and **renters**. Our platform offers a seamless booking process, complete **transparency** on **earnings**, and a **secure payment system**, ensuring that both parties are satisfied.

As we continue to **grow**, our focus remains on ensuring the **safety** and **security** of our users and their **investments**. Our platform offers detailed information on the number of days a car is rented and the number of repairs required, allowing car owners to **keep track of their investment and earnings**.

We are also constantly working to **improve** our platform, by adding **new features and functionalities**, to make the car rental process even more **convenient** and **efficient**. Our ultimate goal is to create a **trusted** and reliable car rental marketplace that benefits both car owners and renters alike.

We are excited about the future of **Carsplit** and look forward to continuing to **innovate** and **provide** the best possible **experience** for our users.

OUR TEAM

Alexander T. Executive Director

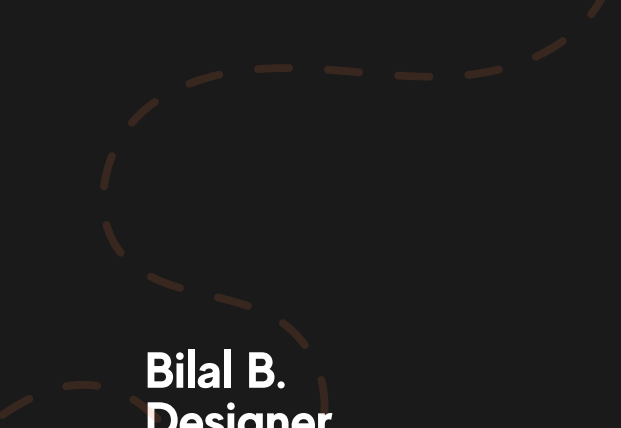

Meet our CEO, a seasoned entrepreneur with a passion for innovation and driving growth. With a background in international business and a top-ranked study abroad program under his belt, he brings a wealth of experience and knowledge to the Carsplit team. His leadership has propelled us forward in the fast-paced world of blockchain and decentralized finance, and we're excited to see where his vision will take us next.

Thomas V. Development Manager

Thomas is a talented businessman who has been a part of many big projects in event and politics. He also created several companies in different domains and leads a company specialized in investment. His master degree in finance and his experience in big national Bank will bring a solid financial side to Carsplit. Thomas has an ability to find effective strategies and carry out projects.

Marc F. Advisor

Meet Marc, former Société Générale trader and founder of a top-ranked broker. With a degree in Financial Engineering from prestigious schools in France, he managed 1 billion euros at Banque Postale. In addition to his expertise, Marc is a talented athlete, having been the French karting champion in 2012 and an official Lamborghini pilot. His diverse skills make him a valuable addition to the Carsplit team.
